PROFILE

Creative project manager with 4+ years running studio operations and client delivery across fashion, lifestyle and digital brands. NIFT-trained in luxury product design, so I read design work as fluently as a timeline or a cost sheet. I plan projects, allocate resources, brief and manage design and production teams, own the client relationship, and review every deliverable before it ships. Currently Project Manager at Aaquib Wani Design; before that, managed 5 to 6 concurrent accounts as sole point of contact at Verseatile, alongside daily production coordination at one of India's largest newspapers. I bring structure to creative work without flattening it.

WHAT I BRING

01 **Plans, timelines, resources.** Built project plans and delivery schedules across 5 to 6 parallel accounts, allocating designers, photographers and vendors against budget.

02 **Team coordination and communication.** Briefed and managed contracted creative teams and kept 10+ contributors accountable across five daily workstreams at The Pioneer.

03 **Client relationships.** Sole point of contact for every Verseatile account: updates, presentations, expectation-setting and concerns.

04 **Risk and mitigation.** Designed review processes and workflow documentation that cut revision cycles and delivery delays by roughly 20 to 25 percent.

05 **Quality of deliverables.** Reviewed all creative output against brand standards before client delivery, from mood board to final asset.

WORK EXPERIENCE

Project Manager | Aaquib Wani Design (Wani Industries Pvt. Ltd.)

In studio | Jul 2026 to Present | Multidisciplinary design studio led by designer Aaquib Wani

- Manage studio projects end to end, from client brief and project planning through production and final delivery
- Build timelines and allocate resources across the in-house design team and external vendors and production partners
- Act as point of contact for clients, running updates, feedback rounds and approvals
- Track deliverables and costs across concurrent projects, reviewing output for quality before it reaches the client

Creative Project Manager and Art Direction Lead | Verseatile

Remote | Feb 2024 to Present | Creative accelerator for lifestyle, wellness and immersive tech brands

- Managed 5 to 6 client accounts at once as direct point of contact, owning each project from planning and concept through execution and final delivery
- Built project plans, timelines and resource allocation across concurrent engagements, tracking vendor costs and supporting cost sheet visibility
- Led art direction across all accounts: shoot ideation, mood boarding and visual identity, from concept to final asset
- Briefed and managed a contracted team of designers, copywriters and photographers, reviewing all work against brand standards before it reached the client
- Presented creative direction, brand strategy and competitor research to clients, turning research into clear positioning recommendations
- Designed operational workflows and review checkpoints that flagged issues early, reducing revision cycles and delivery delays by approximately 20 to 25 percent

Content Operations Consultant | The Pioneer / Daily Pioneer

New Delhi, remote | Sep 2025 to Feb 2026 | Held concurrently with Verseatile

- Coordinated five operational workstreams daily across editorial, design, copy, proofreading and digital publishing, each on independent deadlines

- Kept 10+ internal and third-party contributors accountable in a high-volume, deadline-critical production environment
- Wrote workflow documentation that standardised production processes and reduced handover delays and miscommunication

Project Coordinator and Brand Consultant | Independent Consultancy

Remote | Mar 2023 to Present

- Delivered project coordination and creative direction for digital fashion clients including DressX, DRKMT, Lino Perros and Growster
- Managed third-party designers, photographers and motion artists, briefing direction and overseeing quality and delivery
- Set up project management systems, workflows and accountability frameworks from scratch in early-stage client environments
